

Complimentary Hands-on Workshop at the  
2019 Intravascular Imaging & Coronary Physiology Workshop

## Right Technique, Right Device for Physiologic Assessments

Learn from experts how to improve your confidence in your diagnostic

Learn how to prevent drift and provide physiologic assessment  
in complex anatomies

Products hands-on sessions and Dr. Arnold Seto will answer your questions  
and provide insights on tips and tricks

**Saturday, March 9, 2019**

Attend one of 3 programs:

1:00-2:00 pm, 2:30-3:30 pm, or 4:00-5:00 pm

Room: Studio #4, Second Floor

Conrad New York Hotel

102 North End Avenue, New York, NY 10282

**Arnold Seto, MD**

Director of Interventional Cardiology  
Research,  
School of Medicine, University of California  
Section Chief, Cardiology,  
Long Beach VA Medical Center  
Long Beach, California, USA

**Space is limited, reserve your seat now!**

This hands-on workshop is provided through a generous sponsorship by Opsens, Inc.

## OptoWire®

Your pressure guidewire to **diagnose** and **treat** with confidence

### Workhorse Guidewire Performance

Large nitinol core wire provides you support and torque response

### Worry-Free Reconnect

Take full control of your guidewire to navigate through complex anatomies, diagnose and deliver your stent on the same guidewire

### Atraumatic Reshapable Tip

Access tortuous anatomies and perform several measurements thanks to a safe tip design with exceptional shape retention

### Unsurpassed Accuracy

Minimize drift occurrence with the second generation fiber-optic sensor design
